

Assessment	Description
01 - High	Major changes were made to this feature and therefore a high degree of diligence is recommended
02 - Moderate	Minor changes were made to this feature and therefore a moderate degree of diligence is recommended
03 - Low	Bugs and defects were addressed in this feature and therefore a low degree of diligence is recommended
04 - Not Applicable	No changes were made to this feature

1346

Feature	Count	PM	Assessment	Summary
Access Control	10	Bob Taylor	02 - Moderate	Access Control • Various improvements to make organizations, keys and hooks more manageable through Global Manager
Agent	52	Erick Burgess	02 - Moderate	Agent • Security updates 17 Jira issues • Host Agent PowerPack updated to Python 3 AP-2681, AP-2682, AP-2683, AP-2684 • ScienceLogic: Agent PowerPack update to Python 3 EM-64458, AP-2787 • Gen3 Agent updates for billing AP-2850, AP-2851, AP-2852, AP-2871 • Skylar Data Export AP-2856, AP-2857, AP-2862, AP-2863, AP-2864, AP-2877, AP-2878, AP-2889 • Bug fixes AP-2665, AP-2705, AP-2706, AP-2762, AP-2786, AP-2807, AP-2858 • Tech Debt AP-2780, AP-2796, AP-2797, AP-2802, AP-2813, AP-2816, AP-2854
Analytics	96	Jason Keck	01 - High	Analytics • SL1 now has the ability to stream metrics from SL1 CDB to the ScienceLogic Skylar environment.
Asset Management	12	John Proctor	03 - Low	Asset Management • Updates to GQL API mutations • Security updates
Authentication	65	Bob Taylor	02 - Moderate	Authentication • Various defect and security fixes, notably in EULA, session and encryption key management
Billing/Telemetry	12	John Wang	03 - Low	Billing/Telemetry • Removed feature usage processes from SL1 and updated the test_subscription script for improved self-service troubleshooting
Business Services	102	Jonathan Chivers	01 - High	Business Services • Security vulnerabilities 3 Jira issues • Various defects 46 Jira issues • Business services Investigator 2.0 • Incremental product improvements • UI performance and scaling limit improvements
Content Enablement (Solutions)	0	Leo Nieuwesteeg	04 - Not Applicable	Content Enablement (Solutions) • No changes were made to Content Enablement in the Ibiza (v12.3) release
Credentials Management	45	John Proctor	03 - Low	Credentials Management • Added Hostname and IP Address substitutions to universal credentials • Addressed defects related to credential tests (REF: EM-49241, EM-58881, EM-63927) • Security updates
Dashboards	90	Bryan Harding	02 - Moderate	Dashboards • New widgets added to set (HTML widget and Device Group widget) • Interface widget table updated to remove 50 return limit and mutiple table features added • Organization widget table updated to remove 50 return limit and mutiple table features added • Changes to metric auto-scaling in Barcharts, Line Charts, and tables
Data Collection	79	Erick Burgess	02 - Moderate	Data Collection • Security: 23 Jira issues • Skylar Data Export for Processes, Services, & CBQoS: EM-66299, EM-66457, EM-66458 • Python 3 migration: EM-64039, EM-62121, EM-62102, EM-62098, EM-64552, EM-64503, EM-53612, EM-53611, EM-62100, EM-65486 • Bug fixes: 23 Jira issues
Data Maintenance and Retention	5	John Proctor	03 - Low	Data Maintenance and Retention • Addressed defect with starting in debug mode (REF: EM-59121) • Addressed defect with orphaned entries (REF: EM-65206)
Deployment	39	Isaiah Camp	01 - High	Deployment • Platform refresh for third party applications (K8s, Helm, Ansible, Docker, NGINX, Kernel) • Aurora 3 support • Various defects and security hardening fixes
Device Classification and Categorization	2	John Proctor	03 - Low	Device Classification and Categorization • Security updates
Device Management	175	John Proctor/ Ahmad Sous	02 - Moderate	Device Management • Enhanced device management capabilities in AP2 and GQL • Resolved issues with the Relationships Widget, including missing data and incorrect service/device relationships • Fixed GQL defects including Python 3 updates • Addressed AP2 layout and Bulk Actions issues • Fixed Maintenance Mode log source, hidden data in Configs, and Custom Attribute errors • Addressed defect with bulk user-initiated maintenance not showing in the device logs (REF: EM-55115) • Addressed defect with deleting logs (REF: EM-63379) • Addressed defect when editing component device properties (REF: EM-57376) • Updated the Collector Group sort order in Device Properties (REF: EM-56116) • Addressed issue with device delete performance (REF: EM-62175)
Discovery	24	John Proctor	03 - Low	Discovery • Guided discovery buttons are now disabled if prerequisites are not met • Addressed issue with partial interface discovery that resulted in interface removal (REF: EM-61728) • Addressed issue with interface discovery when non ascii characters are in interface description (REF: EM-62795) • Security updates
Documentation	6	Bryan Anderton	04 - Not Applicable	Documentation • No changes were made to documentation except those related to the Ibiza release.
Event Management	90	Bryan Harding	02 - Moderate	Event Management • Sort changes made to Event Console table • SL1 support for Skylar AI Predicative Analytics driven events (Event table support and updated Event Details) • Text editor replacement in Event Policy Editor • Event Console updates include viewing flat table or masking child events & searching on Event Note • Zebrium rebranded to Skylar Automated RCA
Global Manager	16	Jonathan Chivers	02 - Moderate	Global Manager • Security vulnerabilities 6 Jira issues • Incremental product improvements 6 Jira issues
Groups	6	John Proctor	03 - Low	Groups • Added severity state to REST and GQL API resources • Addressed issue display device added using dynamic rules (REF: EM-57212) • Security updates
Inbound Messaging (syslog/trap/email)	5	Bryan Harding	03 - Low	Inbound Messaging (syslog/trap/email) • TLS support for inbound email
IP Address Management (IPAM)	0	John Proctor	04 - Not Applicable	IP Address Management (IPAM) • No changes were made to IP Address Management (IPAM) in the Ibiza (v12.3) release
ITSM	3	Jonathan Chivers	03 - Low	ITSM • Security vulnerabilities 3 Jira issues
Labels	0	Jason Keck	04 - Not Applicable	Labels • No changes were made to Labels in the Ibiza (v12.3) release
Maps	15	Jonathan Chivers	03 - Low	Maps • Security vulnerabilities 3 Jira issues
Monitors	6	Jason Keck	03 - Low	Monitors • Changes were made to improve the security posture of Monitors
Normalization	0	Jason Keck	04 - Not Applicable	Normalization • No changes were made to Normalization in the Ibiza (v12.3) release
Notifications (Admin Notifier)	0	Ahmad Sous	04 - Not Applicable	Notifications (Admin Notifier) • No changes were made to Notifications in the Ibiza (v12.3) release
Phone Home Collector	0	Isaiah Camp	04 - Not Applicable	Phone Home Collector • No changes were made to Phone Home Collector in the Ibiza (v12.3) release
Platform	247	Eric DeRose	01 - High	Platform • SL1 Database upgrades: MariaDB 10.6 RDS Aurora 3 • HA/DR update (DRBD v9.2) • SL1 Collectors: RestorePoint Agent RPM support (ISO & update) • Python 3 version update (3.6 and 3.11) • Platform Package Updates/CVEs OL8 OS packages SL1 packages 3rd party vendor packages
PowerPack Engine	9	Leo Nieuwesteeg	02 - Moderate	PowerPack Engine • Bug Fixes but recomend moderate due diligence given the issues that have already surfaced.
PowerPacks	9	Dipak Shah	03 - Low	Bugs and defects were addressed in this feature and therefore a low degree of diligence is recommended

Preferences	0	Bryan Harding	04 - Not Applicable	Preferences <ul style="list-style-type: none"> No changes were made to Preferences in the Ibiza (v12.3) release
Publisher	0	Erick Burgess	04 - Not Applicable	Publisher <ul style="list-style-type: none"> No changes were made to Publisher in the Ibiza (v12.3) release
Relationships (DCM, DCM+R, Topology, Ad-Hoc)	5	John Proctor	03 - Low	Relationships (DCM, DCM+R, Topology, Ad-Hoc) <ul style="list-style-type: none"> Addressed defect causing topology collection to hang and sigterm (REF: EM-65416) Addressed defect with encoding characters in LLDP (REF: EM-64633) Added maintenance task to delete old DCM+R relationships (REF: EM-64562) Addressed defect causing error with invalid IP addresses (REF: EM-64160) Addressed defect causing exception when crunching L2 topology (REF: EM-65537)
Reporting	23	Bryan Harding/ Ahmad Sous	03 - Low	Reporting <ul style="list-style-type: none"> Security fixes Several bugs addressed v119 update to SL Core Reports
Run Book Automation	11	Bryan Harding	02 - Moderate	Run Book Automation <ul style="list-style-type: none"> Run Book Automation Policies now support alignment against selected Business Services and new variable for service URL AWS SNS action now supports proxy
Schedules	3	John Proctor	03 - Low	Schedules <ul style="list-style-type: none"> Addressed defect with closing the patch window (REF: EM-64205) Removed legacy Python 2 code Security updates
Service Provider Utilities	1	John Proctor	03 - Low	Service Provider Utilities <ul style="list-style-type: none"> Security updates
Setup & Config	0	Ahmad Sous	04 - Not Applicable	Setup & Config <ul style="list-style-type: none"> No changes were made to Setup & Config in the Ibiza (v12.3) release
SL1 Home	0	Bryan Harding	04 - Not Applicable	SL1 Home <ul style="list-style-type: none"> No changes were made to SL1 Home in the Ibiza (v12.3) release
SLAdmin	0	Ahmad Sous	04 - Not Applicable	SLAdmin <ul style="list-style-type: none"> No changes were made to SLAdmin in the Ibiza (v12.3) release
System Update	42	Isaiah Camp	01 - High	System Update <ul style="list-style-type: none"> Changes to support Python 3 compatibility (Deprecation of Python 2) Implementation of MariaDB 10.6 General bug fixes, package updates, and security remediation
Templates	5	John Proctor	03 - Low	Templates <ul style="list-style-type: none"> Addressed defect where templates duplicate Windows service monitors (REF: EM-55205) Addressed defect with templates when deleting a log monitoring policies (REF: EM-63550) Security updates
Themes	3	Bryan Harding	04 - Not Applicable	Themes <ul style="list-style-type: none">
Ticketing	9	Bryan Harding	03 - Low	Ticketing <ul style="list-style-type: none"> Security updates
Transport	19	Erick Burgess	02 - Moderate	Transport <ul style="list-style-type: none"> Security updates EM-63914, CPL-653, CPL-660 Remove legacy Data Pull code and Python 2 code EM-65783, EM-65784, EM-65785, EM-65786, EM-65787 Update Data Pull to use Python Latest (Python 3.11) EM-64125 Settings added to individually set Data Pull Storage Process amount for HF, MF, and LF EM-65837 Bug fixes EM-65405, EM-66447, CPL-651
UI Frameworks	5	Bryan Harding	03 - Low	UI Framework <ul style="list-style-type: none"> Package updates
Vanish and Purge	0	John Proctor	04 - Not Applicable	Vanish and Purge <ul style="list-style-type: none"> No changes were made to Vanish and Purge in the Ibiza (v12.3) release
Vendors	0	John Proctor	04 - Not Applicable	Vendors <ul style="list-style-type: none"> No changes were made to Vendors in the Ibiza (v12.3) release
